## DIRTSTOP PROTECTION FILM

# REDUCE DEFECTS WITH THE ULTIMATE PROTECTION FILM

Suitable for hard surfaces, walls, windows, and high temp zones

*No other masking film stands up to the ease of use, versatility, and durability of DirtStop protection film*

DirtStop temporary protection film exclusively by RJ Hanlon Company helps trap contamination for removal from controlled environments without leaving a sticky mess behind. This temporary protective film is treated with a unique adhesive formula that locks in dirt, dust, paint overspray, and larger debris without leaving any residual tackifier. The film is available in various colors and sizes, ideal for windows, walls, air showers, and even some high temperature environments.

### PRODUCT DETAILS

#### Reverse wound with transfer liner

Easily rolls, sticking on hard surfaces for install. Transfer liner keeps hands clean, peels to reveal adhesive surface.

#### Captures fine dust and larger debris

Unique adhesive properties lock fine dust and even larger debris on both vertical and horizontal surfaces.

#### Leaves no adhesive residual behind

Clean surfaces stay clean because the specially formulated adhesive does not leave any residual tack on removal.

# DIRT STOP PROTECTION FILM

DirtStop reverse wound adhesive rolls with disposable transfer liner enable it to be easily applied to hard surfaces. Once applied to the surface, peel and dispose the transfer liner revealing the specially formulated adhesive face to begin reducing defects and increasing your quality output.

- Unique adhesive custom formulated for optimal tack
- Leaves no residue; easy repositioning and removal
- Cuts easily and cleanly
- Great tensile strength - Reduces "shredding" upon removal and provides an easier, cleaner release

## TECHNICAL DATA

Description	Details
Purpose	Capture dust, dirt, paint overspray
Colors	Clear, White, Black
Thickness	2 MIL
Roll Length	200'
Roll Width Options	5"; 12"; 20"; 24"; 30"; 36"; 60"
Temperature rating	Up to 400° F

## DIRTSTOP INDUSTRY APPLICATIONS

*Adaptive uses for a wide variety of industries*
